

Call for Papers

Seasons' Greetings to you all and thank you for your contribution to what was once again a very successful conference. All that remains is to submit your paper before the due date of 5 February 2023 and if you wish to do so go to

<https://www.wrec2022.com/abstract.php#publication> and read the introduction, following which there is a brief description of the six journal options from which you can make an appropriate choice. You should consider your choice carefully to facilitate speedy publication.

Papers for journal publication

Make your journal selection carefully and go to <https://www.wrec2022.com/paper-submission.php>, fill out the submission form **and** also send your full paper to Dr David Goodfield d.goodfield@murdoch.edu.au.

A preliminary review of your paper will be made by the conference review committee. You will be advised whether your selection of journal is appropriate, and if approved further instructions will be given for you to submit directly to the journal of your choice. Your paper will then be peer reviewed by this journal and the result communicated with you. Each paper will only be permitted one journal review.

Conference proceedings

As an alternative to journal publication, you may submit a paper to go directly in the conference proceedings published in book form by Springer. Papers that are rejected by the conference review committee for journal publication consideration will, with the author's consent, automatically go to the proceedings. Likewise, papers that are rejected by a journal for publication will, with consent, go to the proceedings. Papers can appear in both the journal of the author's choice and the proceedings but only, for copyright reasons, with a minimum of 75% difference in text between the two.

Continued.....

Make your choice after due consideration in order to get the result you desire. Any queries please contact me.
